Research with Real Impact Series

Highlights of
first two
sessions in
the series

1. Feb. 10th – Community Based Research
2. Feb. 17th – Knowledge Mobilization
3. Feb. 24th – Building Successful Partnerships

Questions for a successful partnership

Community partners should consider...

- Do you trust the researchers and believe they value your expertise?
- Will you be a true partner?
- Do you have the resources to be involved in the project or will you need funding from the researcher?

Both sides need to know the answers to these questions...

- How involved does the community partner want to be in the project?
- How does the community partner want the findings presented at the end of the project?
- What is your timeline or deadlines for the project?

Researchers should consider...

- Are you prepared to deal with the unique needs of the community partner?
- Will you need to provide training or resources to have the community partner take part?
- How integrated an approach do you want to take for knowledge mobilization?

Our Panelists

Michael Johnny, Manager of Knowledge Mobilization, York University

Yvonne Hanson, Provincial Network Manager, Primary and Integrated Healthcare and Innovations Network, University of Saskatchewan

Dr. R. Nicholas Carleton, Professor of Clinical Psychology, University of Regina

Sgt. Casey Ward, Regina Police Service

What do you think are
the key criteria for
successful research
partnerships?

Have you experienced
challenging research
relationships? If so, how
did you address these
challenges?

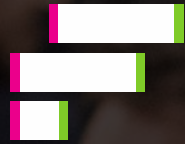

Do you have any tips
for others looking to do
community involved
research?

Helpful Resources

- **Coady International Institute, St. Francis Xavier University**
A detailed resource library with partnership toolkits, case studies, journal articles and more.
